

YOUR EYES ARE THE WINDOW TO YOUR HEALTH

The Daytona Optos is an ultra-widefield retinal imaging system that provides a fast and comfortable digital image of the back of your eye that is available for the whole family.

The Daytona Optos provides a permanent record of the retina that can be used for diagnosing and tracking retinal eye diseases. This technology is performed without having to have your eyes dilated.

There is a **\$39.00** fee for the **Optos** Retinal image that may or may not be covered by your insurance.

_____ I **DO** want to have the **Optos** retinal scan performed at today's visit.

_____ I **DO NOT** want to have **Optos** retinal scan performed at today's visit.
